SYRU 6006 Specification

Power Supply	100-300V AC 50Hz
Battery Backup	8 hrs @ 5ml/Hr flow rate on 50 ml syringe
Power Consumption	<10 VA typical, 23VA At maximum voltage
Display	4x20 LCD & 7 Segment Display for viewing in dark ICUs from long distance, LED Displays for machines current status indication
Applicable Syringe	2ml, 5ml, 10ml, 20ml, 30ml, 50/60ml from programmable up to 1000 brands
Syringe size deduction	Automatic size recognition and manually override the size option available
Custom Syringe programmable	Programmable to any brand of Syringe on field
Syringe brand and size indication	Continuous display of syringe brand and size for quick view
Flow rate Range	0.01 – 350 ml/Hr (2ml Syringe) in increment of 0.01 upto 99.99ml/hr 0.01 – 750 ml/Hr (5ml Syringe) in increment of 0.01 upto 99.99ml/hr 0.1 – 1000 ml/Hr (10ml Syringe) 0.1 – 1800 ml/Hr (20ml Syringe) 0.1 – 2500 ml/Hr (30ml Syringe) 0.1 – 3000 ml/Hr (50/60ml Syringe) 0.1 – 9999 ml
Infused Volume	0.1 to 9999 ml
Target Volume	Display in Infused ML section for last one hour
LAST HOUR infused volume	infused mL volume. To Help accurate Fluid Balance Calculations. Display of Elapsed time from 00.00 to 199:59 hrs
Elapsed Time	Mechanical Accuracy $\pm 1\%$
Accuracy	Including Syringe $\pm 2\%$
Bolus	Purge Bolus & Auto Bolus(hands free bolus operation) with individual key access for quick infusion 0.01 – 350 ml/Hr (2ml Syringe) in increment of 0.01 upto 99.99ml/hr
Bolus Rate	0.01 – 750 ml/Hr (5ml Syringe) in increment of 0.01 upto 99.99ml/hr 0.1 – 1000 ml/Hr (10ml Syringe) 0.1 – 1800 ml/Hr (20ml Syringe) 0.1 – 2500 ml/Hr (30ml Syringe) 0.1 – 3000 ml/Hr (50/60ml Syringe) 0.1ml to maximum volume of syringe in ml in 0.1 ml increments
Auto Bolus Volume	Adjustable Maximum Bolus volume infusion limit per single demand
Bolus Limit	

Sequential Mode	Sequential program of 10 different flow-rate at Available, 10 different programs are available
Dosage Taper Up/Down	0.01 to 20 mL/hr adjustable depending on the syringe size. Possible to disable 20 level selection from 2 modes PSI & mmHg PSI Mode - 1 to 20 PSI mmHg Mode - 100 to 1000mmHg in 50mmHg increment Possible to Disable
Occlusion Pressure	Display of Running Pressure Allowable: PSI & mmHg Saves the previous data even when AC power is switched OFF
Pressure Display	Reverse running possible for pull mL for Accurate Drug start time. Volume selectable with separate key access
Last Data	
Aspire Concept	
Audio & Visual Alarms:	Target reached (time & volume), Occlusion, Syringe not engaged, Syringe holder disturbed during infusion, Near to Empty, Near to target End of syringe, Battery mode, battery low, Internal mechanism fault, KVO Mode, Bolus Mode, PCA Mode, PCA probe disconnected, Patient end drug line disconnected alarm, Operation on mains / battery, Battery low, Mains Over voltage alarm, Mains low voltage alarm, Power Failure Warning alarm, Drive Disengaged, Plunger not engaged alarm
RUN/STOP/ALARM Indication	Corner LED for Long distance quick view indication of status from 30 feet
Night Mode	Night Mode of Operation with Start Time selectable from 18:00 to 22:00 Hours
AMC	AMC reminder for service and maintenance
Alarm Volume	due warning
Modes	Adjustable buzzer volume(OFF – 10 level) Flow Rate only Flow Rate & Target volume Flow Rate & Target Time Target volume and target time Drug Library Mode High pressure Mode Program Mode Dosage Taper up/Down Mode
Drug Library	Available with 2000 drug list can be programmable Flow rate calculation based on patient weight, drug concentration and drug dosage. mL/24 Hr & mL/min Display
Keypad Lock	Keypad Auto lock with adjustable time limit for locking keypad functions
Tube Holder	IV line Tubing holder external available

Stand By	Near	Pause Infusion Facility from 1 min to 24 Hours Standby operation
Empty Time		Adjustable from 3 minutes to 30 minutes
Battery Residual Time		Battery remaining time display Available, post
Anti Bolus Function		occlusion bolus reduction for accidental bolus infusion
Event log with RTC		Available, with 5000 History of records
Flow rate Limitations		Soft limit Function for safe Medication
PCA (Optional)		PCA dose can be preset from 0.1 to 10ml Minimum locking time interval between two Doses from 1min - 24hrs in steps of 1 min Delivered and non delivered doses display
**Connectivity		Upgradable to WiFi connectivity to mobile and Tablets. Machines data can be viewed directly through mobile Application - with HL7 data compatibility (OR) RS232 Communication with HL7 data compatibility Advanced QR code Mobile application for record and clear the service and maintenance on time with GPS location on application
**Service and Maintenance		can be used combinely with Urine Flow meter for Fluid Management system
Fluid management System		Strictly portable and weight 1.8kg (including fixing clamp - rear side)
Weight		Easy to fix in horizontal & vertical pole/Rail
Fixing		EN ISO 13485:2016, EN 60601-1:2006/A1:2013, EN 60601-1-2:2015, EN 60601-1-6:2010, EN 60601-1-8:2007/A11:2017, EN 60601-2-24:2012.
Safety Test		-10 to 50 degree C
Operating & Storage Temperature		
Operating & Storage Humidity		15 to 90%
Operating & Storage Pressure		50 to 106kpa
Certification		European CE, ISO 13485:2016
		SPECIAL APPEARANCE
Front Panel LED		For lighting the syringe area for long distance visibility of syringe drugs & conditions RED, YELLOW codes for alarms
Stackable		Stack up to 4 machines in a single pole
Docking Station		4 pumps can be stacked & power up with single power cord
